

BUSINESS PROPOSAL

Ladies and Gentlemen,
A message from A Production, Ukraine:

A PRODUCTION

An inspired team of experts in their field, offering an opportunity to stretch your shooting budget for advertisements or films without sacrificing quality or time.

UKRAINE OFFERS

A rich and varied landscape featuring mountain scapes reminiscent of fairy tales, valleys and villages from another era, unspoiled forests of varying types, serpentine rivers, the Azov and Black seas, cities with distinctive old and modern quarters, monumental buildings from steel-and-glass to 19th century types, meandering cobbled streets, a range of shooting sites in industrial areas, and even some Soviet-era holdovers.

The array of locations advances the opportunity to enrich your projects with an atmosphere currently underexposed in film and advertising. As an additional kicker, filming in Ukraine means significant savings in production costs.

Ukraine has a developed culture of film appreciation and with a population of 46 million there presents a range of facial types and memorable characters to be utilised in film and advertising projects.

Within a matter of days of first contact, the A Production team can organize an array of services for your project: cast and casting, crew and equipment, studios and locations, shooting and editing, legal matters and licenses, music and music rights, broadcasting and presentation, animation and graphics, encoding and authoring, translations and subtitles, duplication and packaging, etc.

WHO WE ARE

Alyona Yegorova, Executive Producer - With 12 years in the business, she has been involved in the creation of the Kyiv-based production houses Radioactive Film and Adrenaline Brothers. She is the co-founder of the film studio Marmelade Film.
